

“Albrigi Tecnologie” recognises the central role played by workers' Health and Safety in the performance of all the company's operations, and is committed to pursuing continuous improvement goals in this area.

It, therefore, guarantees the availability of any suitable human and economic resources and tools required to transform this commitment into a concrete strategic, all-round goal in addition to the general aims of the organisation.

The company, through its management team, approves and issues this Occupational Health and Safety Policy document, with the aim of making the above-mentioned goal known to all personnel and stakeholders, and with which it undertakes to:

- Comply with legislation and all the applicable agreements concerning health and safety in the workplace in Italy;
- Update, implement and maintain an Occupational Health and Safety Management System in accordance with the ISPESL-UNI-INAIL 2001 Guidelines;
- Comply and maintain a high level of compliance with current legislation and other requirements to which the organisation subscribes, regarding health and safety in the workplace
- Ensure the upkeep and improvement of satisfactory working conditions for staff, in compliance with applicable laws and regulations
- Plan and implement production tasks and processes with criteria that prevent potential accidents and safeguard workers' health and safety, by adopting the most suitable techniques and technologies available on the market;
- Identify and analyse existing risks both on site and at work sites
- Develop and implement appropriate training programmes and maintain a high level of staff awareness and training
- Progressively reduce the overall costs of occupational health and safety, including those resulting from accidents, injuries, near misses and work-related illnesses, by minimising the risks to which employees or third parties may be exposed
- Maintain high standards of emergency preparedness and response
- Periodically verify that this policy, and the management system, are understood, implemented and maintained at all levels of the organisation
- Specifically manage the activity, which is at the heart of the company's processes, carried out both at the company's premises and at external customer sites:
  - By effectively coordinating with the various parties operating in the environments in which the organisation carries out its activities;
  - By ensuring the implementation of specific prevention and protection measures for different work situations.
